

Field Staff Module

Sales One-Pager for Commercial, Marketing, and Support Conversations

GPS Attendance + HR Operations + Payroll Readiness + Reporting

Field Teams

Construction & Industrial

Role-Based Access

CSV Exports

Payrun Workflow

1. Brand Positioning (Editable)

Brand Name: [Your Brand Name]

Tagline: [One-line promise, e.g., "From field attendance to payroll confidence."]

Primary Buyer: Operations-led businesses with distributed staff and payroll compliance needs.

Differentiator: End-to-end workflow from geolocation attendance capture to payrun reporting, with strict role-ID governance.

2. Sales Value Narrative

Business Pain It Solves

- Inaccurate or disputed attendance records
- Disconnected HR and payroll prep processes
- Weak governance for supervisor-level controls
- Manual report consolidation delays

Commercial Outcomes

- Faster attendance verification cycles
- Better payroll cycle preparedness
- Clear role-based operational accountability
- Cleaner reporting handoff to finance/payroll teams

3. Feature Highlights for Demos

Feature	Demo Talking Point	Why Buyers Care
GPS Clock In/Out	Field users submit attendance with location proof and notes.	Creates auditable attendance context.
HR Workspace Tabs	Pay setup, operations, reporting, and assignments in one control center.	Reduces tool switching and admin overhead.
Project Assignment Control	Assign one project to multiple staff with supervisor traceability.	Supports real scheduling and accountability.
Strict Role-ID Allowlist	Project access controlled by explicit role IDs, not title guessing.	Stronger operational governance.
Reporting and Payrun	Generate exports and payrun-ready statements in workflow.	Speeds payroll prep and decision visibility.

4. Pricing Model (Editable Template)

Replace values below with your final commercial pricing before sharing externally.

Plan	Best For	Includes	Suggested Price
Starter	Small field teams launching core attendance and reports	Attendance, basic HR tabs, reporting exports, docs	\$[XX] one-time
Professional	Growing teams needing full operations + payroll setup	All starter + shifts, leave, pay setup, project assignment	\$[XX] one-time
Business	Larger teams requiring implementation support	All professional + onboarding package + priority support window	\$[XX] one-time

Important: finalize license scope, support terms, and update policy before publication.

5. Objection Handling Cheatsheet

"Will this fit our current workflow?" Yes. The module mirrors standard attendance, scheduling, leave, and payroll-prep flow in one interface.	"How secure is supervisor access?" Project Assignment access uses strict explicit role-ID allowlist with server-side checks.
"Can we export data for finance?" Yes. Attendance and operations reports are exportable in CSV for downstream workflows.	"What if exceptions happen in the field?" Manual attendance and leave workflows cover operational exceptions with controlled updates.

6. Support Handoff Summary

- Full setup, permissions, API, and workflow docs are included.
- Support policy and UAT checklist are available for consistent issue handling.
- Versioned changelog supports release communication and customer updates.
