

Field Staff Module

Sales One-Pager for Marketing, Sales, and Support
GPS Attendance | HR Operations | Payroll Readiness | Reporting

1. Brand Positioning (Editable)

Brand Name: [Your Brand Name]
Tagline: [One-line promise, e.g., From field attendance to payroll confidence.]
Primary Buyer: Operations-led businesses with distributed staff and payroll compliance needs.
Differentiator: End-to-end workflow from geolocation attendance capture to payrun reporting, with strict role-ID governance.

- Business pain solved: disputed attendance, disconnected HR/payroll prep, weak access governance, delayed reporting handoff.
- Commercial outcomes: faster verification cycles, improved payroll readiness, clear role accountability, cleaner finance handoff.

Feature	Demo Talking Point	Why Buyers Care
GPS Clock In/Out	Field users submit attendance with location proof and notes.	Creates auditable attendance context.
HR Workspace Tabs	Pay setup, operations, reporting, and assignments in one control center.	Reduces tool switching and admin overhead.
Project Assignment Control	Assign one project to multiple staff with supervisor traceability.	Supports real scheduling and accountability.
Strict Role-ID Allowlist	Project access controlled by explicit role IDs, not title guessing.	Stronger operational governance.
Reporting and Payrun	Generate exports and payrun-ready statements in workflow.	Speeds payroll prep and decision visibility.

4. Pricing Model (Editable Template)

Plan	Best For	Includes	Suggested Price
Starter	Small field teams launching core attendance and reports	Attendance, basic HR tabs, reporting exports, docs	[\$XX] one-time
Professional	Growing teams needing full operations and payroll setup	All starter + shifts, leave, pay setup, project assignment	[\$XX] one-time
Business	Larger teams requiring implementation support	All professional + onboarding package + priority support window	[\$XX] one-time

Important: finalize license scope, support terms, and update policy before publication.

- Will this fit our workflow? Yes. It mirrors attendance, scheduling, leave, and payroll-prep flow in one interface.
- How secure is supervisor access? Project Assignment uses strict explicit role-ID allowlist with server-side checks.
- Can we export for finance? Yes. Attendance and operations reports export to CSV.
- What if field exceptions happen? Manual attendance and leave workflows handle exceptions with controlled updates.
- Full setup, permissions, API, and workflow docs are included.
- Support policy and UAT checklist are available for consistent issue handling.
- Versioned changelog supports release communication and customer updates.
